

Smart Buses

Smart school buses, when powered by a private LTE network, represent a significant advancement in public transportation technology.

What are smart buses?

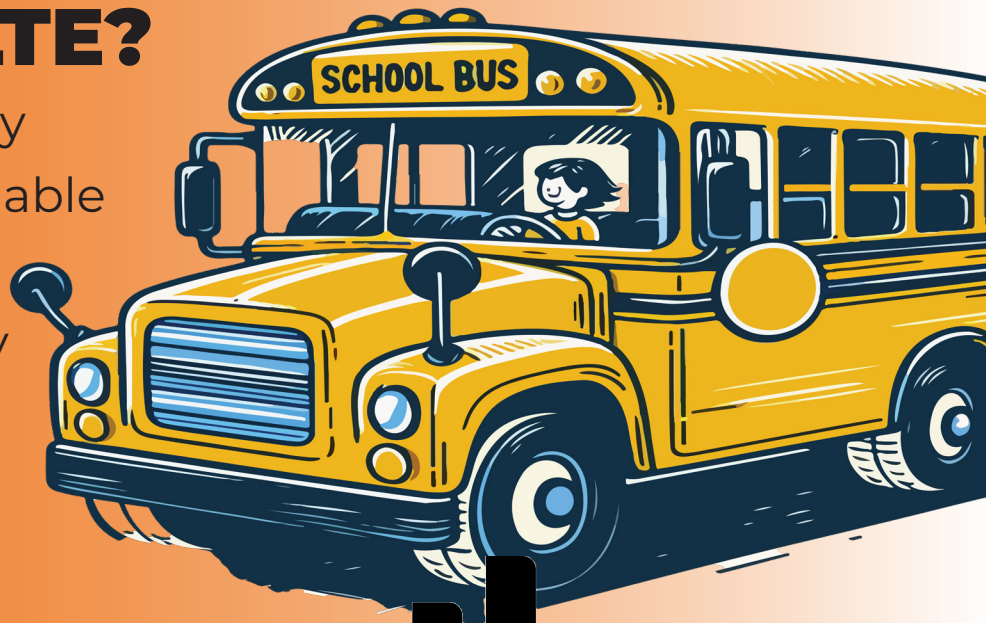

- New technology based buses
- Adds new ways of connectivity
- Adds features

What can they do?

- Real-time monitoring
- Wi-Fi Connectivity through LTE
- Safety and Security, like CCTV
- Predictive Maintenance

Why private LTE?

- Dedicated Capacity
- Consistent and reliable
- Lower Latency
- Enhanced Security
